

WEEKLY FOCUS

The changing dynamics of Civil Services Examination highlights that understanding of a particular topic in itself is not sufficient, a candidate must be able to link it to various other relevant topics of the syllabus as well. We have tried to address this need through our new initiative 'Issue this week'.

It is our **weekly document which will cover one major topic holistically** including its static and dynamic components along with various possible aspects and dimensions related to it. Topics covered under this series will comprise those issues which:

- have been in news regularly over a period of time and have seen multiple developments on the issue.
- have a background which needs to be explained and are also connected to the current events.

In order to bring more ease to the reader in comprehending the topic, we **will cover different dimensions of a particular topic by drafting questions**. It will offer insights into a topic based on the core questions of: What, When, Where, Why and How and will also help the aspirants to get an idea as to on what lines should a topic be studied.

As an add on, aspirants will also find **use of mind maps, flow diagrams and other such schematics along with the key data and keywords** which can be used for revision in general and can also be used directly in the examination to improve the presentation and visibility of their answers.

The consolidated and comprehensive information provided in this weekly document will certainly establish a strong foundation for the study of a given topic. This would also indirectly help aspirants in reducing the time required in referring various sources and collecting information so that they can give more time for understanding, learning and revising the topic.
